

## Term One Pottery and Ceramics Classes

Gargoyles, planters for the garden or even a new handmade dinner set, why not try your hand at pottery? All levels, techniques and projects catered for. Expert tutor Peter Anderson will take you through the techniques you need to make your projects work. This class also gives you the opportunity to work on your projects outside of the set class times. Participants who join the T.C.A. are welcome to come back and work on their projects anytime between classes. The studio is light and airy with plenty of bench space, wheels, extruders, a slab roller and two kilns. Participants will also have access to the T.C.A. library and the extensive collection of ceramics by Australian and International Ceramicists. Cost includes basic materials, white stoneware clay, hand building clay and a selection of underglaze colours and a range of coloured and clear glazes. Small firing fees will apply which are calculated by size of works produced.

Bookings are essential and numbers are limited
